

Spin. Spin is a quantum property of particles. Bosons have integer spin. Fermions have half-integer spin. A particle with non-zero spin has left- or right-handed chirality.

Electric Charge. Each particle has positive, negative, or zero electric charge.

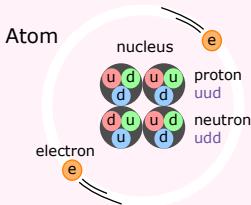

Color Charge. A quark has one of three color charges called red, green, or blue. An anti-quark has an anti-color. A gluon has a color and an anti-color.

Elementary Particles

This shows all the elementary particles in the standard model (SM) of particle physics plus some hypothetical particles.

Fermions half-integer spin $\frac{1}{2}$ $\frac{3}{2}$

Matter is made of fermions. Fermions obey the exclusion principle.

Standard Fermions

| Quarks | Leptons | spin | generation | | |
|----------|-------------------|---------------|-------------------------------------|-------------------------------------|-------------------------------------|
| | | | I | II | III |
| up | electron neutrino | $\frac{1}{2}$ | u $\frac{2}{3}$ d $-\frac{1}{3}$ | c $\frac{2}{3}$ s $-\frac{1}{3}$ | t $\frac{2}{3}$ b $-\frac{1}{3}$ |
| down | muon neutrino | $\frac{1}{2}$ | d $-\frac{1}{3}$ e $-$ | s $-\frac{1}{3}$ μ^- | b $-\frac{1}{3}$ τ^- |
| electron | tau neutrino | $\frac{1}{2}$ | e $-$ ν_e | μ^- ν_μ | τ^- ν_τ |

Bosons integer spin 0 1 2

Forces are carried by gauge bosons. Bosons do not obey the exclusion principle.

Quantum Gravity
Planck scale 10^{19} GeV
?

Grand Unification
GUT scale 10^{16} GeV
?

Electro-weak
EW scale 10^2 GeV
Weak force
Flavor change
radioactivity
Electromagnetic force
charges attract/repel, light
Higgs field(s)
creates mass, breaks symmetry

Standard Bosons

| Gauge Bosons | Force Carriers | spin | Gauge Bosons | | |
|----------------|----------------|------|----------------|---------------|-----------------------|
| | | | Scalar Bosons | 1 | 2 |
| graviton | ? | ? | G | graviton | Gravitational force |
| gluon | g | 1 | gluon | massless | Strong force |
| W _i | W _i | 1 | W _i | massless | Weak force |
| B | B | 1 | W [±] | 80 GeV 91 GeV | Z |
| H ⁰ | H ⁰ | 0 | B | massless | Electromagnetic force |
| H [±] | H [±] | 0 | photon | massless | |
| Higgs | Higgs | 0 | H | 124-127 GeV | Higgs field |

Electroweak symmetry breaking

Unified forces split by symmetry breaking.

Other elementary particles may yet be discovered.

String theory proposes that all elementary particles are actually tiny vibrating strings.

Composite Particles – Hadrons

Composite particles are composed of two or more elementary particles. This shows some of the hundreds of known composite particles.

Composite Fermions – Baryons

Baryons are fermions composed of three quarks.

This shows only the baryons made of u, d, and s quarks.

spin $\frac{1}{2}$ octet

p proton
n neutron
 Σ sigma
 Λ lambda
 Ξ xi

spin $\frac{3}{2}$ decuplet

Δ delta
 Σ sigma
 Ξ xi
 Ω omega-minus

spin 0 nonet

π pion
 η eta
K kaon

spin 1 nonet

ρ rho
 ω omega
 ϕ phi
K kaon

u | \bar{u}
e⁻ | \bar{e}^+

Antiparticles. Each particle has an antiparticle with the same mass and spin, but opposite charge. A particle with no charge may be its own antiparticle.

+ | -

Mixtures. Some elementary particles are mixtures (linear superpositions) of other elementary particles.

? **Hypothetical.** Postulated particles that many physicists expect will be discovered.

? **Supersymmetry (SUSY) theory** proposes a partner boson for each fermion and a partner fermion for each boson.

Superpartner Bosons – Sfermions

| Squarks | Sleptons | Gauginos | generation | | |
|----------|--------------------|----------|-----------------|-------------------|--------------------|
| | | | I | II | III |
| up | selectron | ? | u | s | t |
| down | smuon | G | d | s | b |
| electron | stau | ? | e ⁻ | $\tilde{\mu}^-$ | $\tilde{\tau}^-$ |
| neutrino | electron sneutrino | ? | $\tilde{\nu}_e$ | $\tilde{\nu}_\mu$ | $\tilde{\nu}_\tau$ |

Superpartner Fermions

| Gauginos | spin | | |
|------------|----------------|------------|------------|
| | 3/2 | 1/2 | 1/2 |
| gravitino | G | gravitino | ? |
| gluino | g | gluino | ? |
| wino | W _i | wino | wino |
| zino | Z | zino | zino |
| bino | B | bino | bino |
| photino | γ | photino | photino |
| neutralino | H ⁰ | neutralino | neutralino |
| chargino | H [±] | chargino | chargino |
